About Me

A motivated IT student who is interested in coding and to learn new technologies and has great passion to work in IT industry of New Zealand. I vow that I would use my innovative ideas, talent, and full commitment to work. I feel that my strongest strengths are firstly having a passion for technology and software engineering. Moreover, I hold a work-visa for 3 years till 2023, which enables me to work full time.

Technical skills

Expertise in using Microsoft office, Visual Basic, HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js, Node.js, MySQL

Academic projects

Sprint CRM

During my internship I got an opportunity to develop a customer relationship Management application which helps to maintain a sustain relation with customers, and was created using Node.js and MySQL.

Diabetic Prediction Application

For the course Data analytics and visualization in my PG diploma in IT I got an opportunity to develop a diabetes prediction data product. It is created in Microsoft Excel 2019 using programming language 'Visual basics' and the IDE used is Visual Basics for Application (VBA).

Park Buddy

While doing PG diploma in IT at EIT I got an opportunity to create a mobile application for Wilson Parking which solves the problem of unavailability in parking space. I worked in a team of 5 members and we followed an AGILE-SCRUM project management methodology. During this process I got an opportunity to explore about processes like conducting

contextual enquiry, designing personas based on user groups, creating user stories and finally to develop both low fidelity and high-fidelity wireframes.
